

# Table of Contents

Lesson	Content	Class Date	Notes
201	Orientation, Safety, Introduction to Meters, Feeder/Branch Circuits		
202	Service Calculations		
203	Services		
204	Conductor and Overcurrent Protection		
205	Grounding and Bonding Part I		
206	Grounding and Bonding Part II		
207	Wiring Methods		
208	Wiring Materials, Conduit and Box Fill		
209	Mid-Term Review and Exam		
210	Switches, Switchboards, and Panelboards		
211	Equipment for General Use		
212	Introduction to AC Theory		
213	AC Theory I		
214	AC Theory II		
215	Single-Phase Transformers Part I		
216	Single-Phase Transformers Part II		
217	First Semester Exam Review		
218	First Semester Final Exam		

# Table of Contents

Lesson	Content	Class Date	Notes
219	Power Generation – Three-Phase Transformers, Circuits, and Calculations		
220	3Ø Transformers – Delta-Delta		
221	3Ø Transformers – Delta-Wye		
222	Transformers for Non-Linear Loads – 3Ø Fault Currents – Voltage Drop		
223	NEC® Requirements for Transformers		
224	Buck-Boost Transformers: Single- and Three-Phase		
225	Buck-Boost Transformers: Connection and Selection		
226	Generators and Transfer Switches		
227	Mid-Term Review and Exam		
228	Electric Motors – DC and 1Ø AC		
229	Electric Motors – Polyphase		
230	Motors: General Knowledge and Sizing Branch Circuit Conductors		
231	Motor Branch Circuit Overcurrent Protective Devices: Short Circuit and Ground Fault Protection		
232	Motor: Branch Circuit Grounding Conductors, Disconnects, Starters, and Overload Protection		
233	Locked Rotor Current and Phase Loss for Motors-A/C and Refrigeration Equipment Generators and Fire Pumps		
234	Motor Feeder Conductors, OCPDs, and Taps – Motor Branch Circuit Conductors and OCPDs		
235	Final Exam Review		
236	Second Semester Final Exam
